

## Forged Sebra

The dark wooden handle of the Forged Sebra series radiates a chic warmth. The combination with the hammered blade and the subtle red detail on the head makes this series truly special. Tough and stylish, hand-made from Japanese 440C steel with a hardness of 58 Rockwell. The knives of Forged Sebra are a striking appearance that deserves to be seen.

## Maintenance

Forged knives come with a 10-year guarantee. In order to enjoy your unique, handmade Forged knife for as long as possible, it is recommended that you use and maintain it properly.

For example, the knives should be washed by hand and only stored once they have dried properly.

For extra protection, at home or on the go, matching leather covers are also available under the name Forged Leather.

## About Forged

With Forged, you'll have character on your hands. The brand stands for cooking with personality. This includes a handmade knife that is as unique as you are. The Forged collection consists of various series, each with its own charisma and qualities. Show what kind of steel you are made of and choose a knife that suits you.

Forged stands for craftsmanship and tradition. Eye-catching design, robust quality and great value for money. Designed out of a genuine love for cooking, barbecuing and dining. Each knife is handmade from Japanese steel in a workshop that exudes a true passion for the craft: the heat, the smell and orange glow of the fire, and the hissing sound as the metal is cooled. On the blade, you can literally see the hammerblow of the blacksmith. And every time you use and sharpen the knife, it becomes an even more personal knife. That's what makes your knife unique.
